Fig. 3. Subacute effect of *Lavandula stoechas* essential oils on acute alloxan-induced changes in liver and kidney CAT (A and B), Total SOD, Cu/Zn-SOD, Mn-SOD and Fe-SOD (C and D). Animals were treated during 15 days with *Lavandula stoechas* essential oils (50 mg/kg b.w., i.p.) or vehicle (NaCl 0.9%) seven days after diabetic induction with alloxan at 220 mg/kg b.w. Assays were carried out in triplicate. **HC**: Healthy Control; **DC**: Diabetic Control; **H+EO**: Healthy + Essential Oils; **D+EO**: Diabetic + Essential Oils.

“a”: $p < 0.05$ compared to “Healthy Control” group and “b”: $p < 0.05$ compared to “Diabetic Control” group.
