Baseline data for the 15005 people aged ≥ 3 years which participated in the study and complete inform consent

Aged ≥ 20 years (N=10366)

Allocated to the control group (N=6437)

Excluded the intervention group (N=3929)

Participants in the second examination (N=3960)

Participants in the third examination (N=4248)

Participants in the fourth examination (N=4217)

Exclusion of participants that have not baseline measurements of lipid levels (N=196)

Exclusion of participants that have not follow up measurements of lipid levels at any examination (N=1290)

Analysis of data on 4951 participants

Exclusion of participants that have cardiovascular disease at examination I or any follow up examinations (N=419)

Exclusion of participants that were used lipid lowering drug examination I or any follow up examinations (N=2138)

Analysis of data on 2394 participants

Exam I: 1999-2001

Exam II: 2002-2005

Exam III: 2005-2008

Exam IV: 2008-2011
