The figure shows a graph of ΔHb concentration (µmol·L⁻¹) over time (sec) with markers for various events:

- **“right turn”**
- **contact with air**
- **traffic controller**
- **“approach”**
- **“landing”**
- **“engine shutdown”**

The graph distinguishes between 

- Red line: O₂Hb
- Green line: HHb

Key events and time markers are indicated on the graph with arrows and labels.
