The graph shows the levels of TNF-α (pg/ml) with different treatments.

- **unstim**: Baseline measurement without stimulation.
- **HA**: Treatment with HA.
- **NAC 20mM**
- **H₂O₂ 1000 uM**
- **HA + H₂O₂**
- **HA + H₂O₂ + NAC**

The graph indicates a significant increase in TNF-α levels with the combination of HA + H₂O₂ + NAC compared to other treatments.
