**A**

Anti-EGFR 1 and Anti-EGFR 2 cell arrays.

**B**

Graph showing the relationship between signal intensity and sample concentration for siEGFR and ALLSTAR treatments. 58% reduction and 85% reduction are indicated.

- **Signal intensity** on the y-axis.
- **Sample concentration [μg/μl]** on the x-axis.
- **siEGFR** and **ALLSTAR** treatments distinguished by color (green and blue respectively).
