The diagram shows the SF-6D Health Utilities for different levels of flares in the last 12 months. The categories are:

- No tophi
- Not sure
- 1+ tophi

The x-axis represents the number of flares in the last 12 months, ranging from 0/ don't recall to 6+. The y-axis represents the SF-6D Health Utilities, ranging from 0.50 to 0.80.

The bars indicate the average utility with error bars showing the variability.
