RVVC patients currently having the disease (≥4 acute episodes during past 12 months)  
\( n = 620 \)

- RVVC patients having acute episode on day of questionnaire completion (FR, IT, SP, GER, US)  
  \( n = 30 \)
  EQ-5D asked for day of quest. completion (acute episode)  
  \( n = 30 \)  
  Utility = 0.64

- RVVC patients between acute episodes on day of questionnaire completion (FR, IT, SP, GER, US)  
  \( n = 490 \)
  EQ-5D asked for other days (between episodes)  
  \( n = 490 \)  
  Utility = 0.50

- EQ-5D acute episodes  
  \( N = 520 \)  
  Utility = 0.51

- EQ-5D between episodes  
  \( N = 520 \)  
  Utility = 0.70

- RVVC patients on day of questionnaire completion in UK  
  \( n = 100 \)
  EQ-5D asked for day of quest. completion  
  \( n = 100 \)  
  Utility = 0.74

- EQ-5D asked for other days (acute episode)  
  \( n = 490 \)  
  Utility = 0.69

RVVC patients on the day of questionnaire completion  
\( n = 620 \)  
Utility = 0.70
