The graph illustrates the PAID score over two weeks, with the following elements:

- **Weeks 1 and 2** are marked on the x-axis.
- The y-axis represents the PAID score, ranging from 30 to 50.
- **Pretest-Posttest** and **Thentest-Posttest** are represented by distinct lines.
- **Response Shift Effect** and **Reported Effect** are shown as different lines, contributing to the **Total Effect**.

The graph visually compares the changes in PAID scores across the two weeks, highlighting the impact of response shift and the reported effect on the total effect.
