The diagram illustrates the utility score for EQ-5D, SF-6D, and SGRQ across different stages of disease (Stage III and Stage IV) and conditions (Adm. and Dis.). The box plots display the distribution of scores with the median, quartiles, and outliers indicated. The y-axis represents the utility score (EQ-5D, SF-6D), while the x-axis indicates the different combinations of stages and conditions. The total score for SGRQ is also shown on the right y-axis, ranging from 0 to 100.
