The Kaplan-Meier survival curves show the percentage of patients remaining disease-free over different time periods. The curves are color-coded as follows:

- **MUC4- /MUC2+** (green)
- **MUC4- /MUC2-** (yellow)
- **MUC4+/MUC2+** (blue)
- **MUC4+/MUC2-** (red)

Significant difference is indicated by an asterisk (*) at the 60-month mark, with a p-value less than 0.05 (P<0.05).
