The graphs illustrate the relationship between Progesterone (ng/ml) and Follicle diameter (mm) as well as Days before predicted ovulation. The left graph shows a strong correlation with Dominant follicles: $r = 0.83$, $p < 0.0001$. The right graph also demonstrates a strong correlation with Dominant follicles: $r = 0.77$, $p < 0.0001$. The data points for Non-dominant follicles are shown with open circles.
