A. mPR-α mRNA levels (% of control) over time (2h, 6h, 12h, 24h).

B. mPR-α mRNA levels (% of control) in response to TGF-β1 concentrations (0, 0.1, 1, 10 ng/ml).

C. mPR-α mRNA levels (% of control) in response to control, hCG, hCG+TGF-β, TGF-β conditions.
