Figure 5

![Graph showing the relationship between percent change of arteriolar diameter to Ach and percent change of NO-associated fluorescent intensity. The graph includes data points for various groups: Young, Aged+Veh, Aged+Gen, Aged+Without-Ex, and Aged+Ex. A linear regression line is fitted to the data with the equation $y = 0.3567x - 0.7287$ and an $R^2$ value of 0.8734.]
