**Figure 2**

**Panel A:**
- Bands labeled as testis, epididymis, and submax. gland are visible.

**Panel B:**
- Comparative analysis of gene expression across different tissues (Liver, Heart, Kidney, Lung, Brain, Testis).
- Bands at 2.0kb and 1.5kb.

**Panel C:**
- Gel electrophoresis showing bands for testis samples at different developmental stages (3d, 8d, 16d, 25d, 30d, 40d, adult, ovary).
- Additional bands for 25d RT, 40d RT, genomic DNA.
- Scale markers for 1 kb and 500 bp.
