Figure 1

Comparison of age at menarche between T1DM before menarche, T1DM after menarche, and NHANES 2001-2006 non-diabetic groups. The P-values indicate statistical significance:

- T1DM before menarche vs. T1DM after menarche: P=0.0015
- T1DM before menarche vs. NHANES 2001-2006 non-diabetic: P<0.0001
