Figure 3

Panel A: Bar graph showing the incorporation of 
$^3$H-Na (dpm/mg follicular wall) for different types of follicles: SA, PO, and Cystic.

Panel B: Table summarizing the total and spontaneous release of hormones for Small antral, Preovulatory, and Cystic follicles.

- **Total Release (%):**
  - Small antral: 2.8 ± 0.57
  - Preovulatory: 2.1 ± 0.14*
  - Cystic: 1.3 ± 0.12*

- **Spontaneous Release (%):**
  - Small antral: 0.50 ± 0.06
  - Preovulatory: 0.35 ± 0.04*
  - Cystic: 0.57 ± 0.13

Panel C: Graphs showing the fractional release over time (in minutes) for different follicle types.
