(A) Problem stream*
Scientific literature
Recommendations (implementation of a screening)
Technological developments
Feasibility (organisational; technical)

Absence of screening: shortcoming in preventive medicine

Opening of a window of opportunity for the political agenda-setting and policy decision

Decision to introduce a screening programme - Funding

(B) Policy stream (proposals)*
Local initiatives & feasibility
Stakeholders: drafting of proposals; network
Search for solutions to financial issues

Common proposal by stakeholders → policy maker (minister of health)

(C) Politics stream*
Specific political context (preventive medicine)
Awareness raising of policy makers
Election and integration of the issue in government policy

Policy makers made aware of the issue
