No UNHS in the FWB

Scientific literature:
prevalence of hearing impairment; positive effects of early intervention

1994: Recommendation of UNHS (JCIH)

>1994: Recommendations:
- re-assessment
- from other experts

Organisational feasibility (local / regional), in other contexts than FWB

Absence of UNHS = shortcoming in preventive medicine

Development of new technologies:
hearing aids, cochlear implants; objective hearing screening tests

Technical feasibility
