Update simulation data

Patients enter one-year simulation cycle

Treatment effects applied in simulation cohorts

Model generates baseline population

Simulation conditions set

PROactive Simulation model

- Retained CDM sub-models
  - Nephropathy
  - Neuropathy
  - Foot ulcer
  - PVD
  - Cataract
  - Hypoglycaemia

- New PROactive sub-models
  - Non-fatal AMI
  - Non-fatal stroke
  - ACS
  - Bypass surgery
  - HF
  - Hospitalized HF
  - TIA
  - Oedema
  - Photocoagulation/SVL
  - Major leg amputation
  - All cause mortality
  - CVD-related mortality

Update simulation data

Patients alive? Time horizon reached?
