Figure A: Western blot analysis of p-JNK, JNK, p-AKT, and actin in samples treated with PMT, LPS, LPS/PMT, Wortmannin, and Ptx.

Figure B: IL-12p40 levels in unstimulated, PMT, LPS, LPS/PMT, LPS/PMT, and LPS/PMT treated samples with or without Wortmannin and Ptx. Significant differences are indicated by *p < 0.05 and **p < 0.01.

Figure C: CPM values in Monocytes treated with PMT, LPS, LPS/PMT, LPS/PMT, and LPS/PMT with or without Wortmannin and Ptx. Significant differences are indicated by *p < 0.05.
