Basic Research
- Animal models
- Basic research *in vivo, in vitro*
- Development of new compounds

Clinical Research
- Clinical research phase 3

Translational Research (phase I)
- Cases series
- Clinical trial phase 1 e2-Proof of concept trials
- State and trait biomarkers, surrogate outcomes
- New tools/technologies
- Bioinformatics

Translational Research (phase II)
- From clinical research to medical care
- New public health policies
- Priorities: Prevention and intervention
