Supplementary Figure 1. Summary of immunization protocols.

- Immunization with gp100\textsubscript{25-33} peptide plus CpG adjuvant
- gp100 gene immunization
- Immunization with gp100\textsubscript{25-33} peptide-pulsed DC

Supplementary Figure 2. Comparative analysis of the different control protocols for gp100 vaccination. Data, expressed as mean ± SD, refer to one of two separate experiments performed treating 4 mice per group. Identical results were obtained in the other experiment.
