Activity of CD39 in Normal and Malignant Cells

**Cell Type**

- normal lymphocytes
- B-lymphocytes
- CLL (all)
- CLL stage 0-2
- CLL stage 3-4

**Activities**

- ADPase
- ATPase

The diagram shows the activity of CD39 in different cell types, measured in pmol/min/50K cells. The activities are compared between normal lymphocytes, B-lymphocytes, and various stages of CLL, indicating differences in CD39 activity among these cell types.
