The graph shows the concentration of TXB$_2$ (pg/ml) with error bars indicating variability. The treatments compared are:

- **ASA + Clopidogrel**
- **ASA**
- **Clopidogrel**
- **Controls visit 1**
- **Controls visit 2**

Significance levels are indicated by asterisks: 

- **ns** (not significant)
- ******* (highly significant)

The graph suggests that there are significant differences in concentration levels among the treatments.
