The graph shows the DHA content (%) and particle size over time (in months) for a particular sample.

- **DHA Content (%)**:
  - 0 months: 98.5 ± 0.5%
  - 1 month: 100.0 ± 0.3%
  - 2 months: 99.8 ± 0.2%
  - 3 months: 99.0 ± 0.6%
  - 6 months: 96.0 ± 0.5%

- **Particle Size (nm)**:
  - 0 months: 200 ± 20 nm
  - 1 month: 250 ± 20 nm
  - 2 months: 250 ± 20 nm
  - 3 months: 250 ± 20 nm
  - 6 months: 250 ± 20 nm

The DHA content remains relatively stable over the 6-month period, with slight fluctuations. The particle size, however, shows a slight increase over time.
