Discharge voltage (V) vs. Capacity (mAh $g^{-1}$) for different discharge currents and cut-off voltages:

(a) Discharge current: 0.2 mA cm$^{-2}$, Cut off voltage: 2.35 V~4.35 V

(b) Discharge current: 0.4 mA cm$^{-2}$, Cut off voltage: 2.35 V~4.35 V

(c) Discharge current: 0.6 mA cm$^{-2}$, Cut off voltage: 2.35 V~4.35 V
