Figure 6a. System MSE's for Case B.

The figure illustrates the system MSE's for Case B, averaged over all channel realizations. Different algorithms are represented by distinct markers and line styles. The axes are labeled as follows:

- **Y-axis**: sum MSE
- **X-axis**: SNR (dB)

The algorithms compared include:
- GIA-ATP
- PMMSE-ATP
- PMMSE-IAP
- PMBER-ATP
- PMMI-ATP
- PSVD-ATP

The plot shows how the sum MSE decreases as the SNR increases for each algorithm.
