The graph illustrates the percentage of dropped bundles across different routing protocols. The x-axis represents the routing protocols: First Contact, Spray and Wait, and GeoSpray. The y-axis shows the percentage of dropped bundles, ranging from 0 to 30%. The protocols are color-coded as follows:

- **SISD** (blue)
- **DISD** (red)
- **SIDD** (green)
- **SIMHD** (purple)

The bars for First Contact show a significantly higher percentage of dropped bundles compared to Spray and Wait and GeoSpray.
