$\Pr[f=1]$ vs $as(f)$ for different values of $K$. The dashed line represents the lower bound.

- $\triangle K = 2$
- $\bullet K = 3$
- $\times K = 4$
- $+$ $K = 5$
- $\bigcirc K = 6$
- $\times K = 7$
- $\times K = 8$
- $\bigoplus K = 9$
- $\bigcirc K = 10$
- $\square K = 11$
