The figures depict the bit error rate (BER) as a function of the quality of JPEG compression for different error correction codes. Figure (a) shows BER for various codes including No FEC, Repetition, Hamming, BCH 15 7, BCH 63 16, and RS 448 8 S. Figures (b) and (c) focus on BER for JPEG-1024 compression with specific images: Bear, Leaf, Monkey, Plant, and Water.
