A

History

- Culprit insect definitely identified
  - Skin test IgE
    - Mono sensitization
    - Double sensitization: significant difference between venoms
    - Double sensitization: equal reactivity to both venoms
      - Single VIT

- Culprit insect probably identified

B

History

- Culprit insect not identified
  - Skin test IgE
    - Mono sensitization
    - Double sensitization: significant difference between venoms
    - Double sensitization: equal reactivity to both venoms
      - Single VIT

C

History

- Clinical reactions to both insects
  - Skin test IgE
    - Mono sensitization
    - Double sensitization: significant difference between venoms
    - Double sensitization: equal reactivity to both venoms
      - Single VIT
      - Double VIT
