Figure 2

(A) Relative luciferase activity (FLuc/RLuc) for control, Wnt6, and wg treatments.
(B) Relative mRNA levels for wg and Wnt6.
(C) Illustration of mechanosensory and chemosensory bristles.
(D, D’) Frequency distribution of spacing between chemosensory bristles for Wnt6 KO and control.
(E, E’, F, F’) Examples of expression patterns with ptc>uas-wg, ptc>uas-Wnt6, and Dll.
