Patients admitted to rehabilitation (n = 1225)

Excluded (n = 214)
- Declined (n = 197)
- Unable to gain informed consent due to cognitive or speech impairment and no next of kin available (n = 14)
- Enrolled in another intervention trial (n = 3)

Consented to participate (n = 1011)

Excluded (n = 15)
- Discharged prior to randomisation (n = 14)
- Withdrew prior to randomization (n = 1)

Baseline: measured FIM, TUGT, 10MWT, MMAS, EQ-5D
Randomized (n = 996)
(n = 496)
(n = 500)

Lost to Discharge follow-up
- deceased (n = 2)
- withdrew (n = 1)

Intervention Group
- Received physiotherapy and occupational therapy Monday to Saturday

Control Group
- Received physiotherapy and occupational therapy Monday to Friday

Discharge: measured LOS, FIM, EQ-5D and walking ability
(n = 495)
(n = 499)

Lost to 6 month follow-up
- unable to contact (n = 17)
- deceased (n = 31)
- withdrew (n = 16)

6 months: measured FIM and EQ-5D
(n = 431)
(n = 421)

Lost to 12 month follow-up
- unable to contact (n = 18)
- deceased (n = 21)
- withdrew (n = 8)

12 months: measured FIM and EQ-5D
(n = 402)
(n = 411)

Analysed (intention to treat)
(n = 496)
(n = 500)
