Assessed for eligibility (159 schools)

Excluded (99 out of 159 schools)
- 6 schools; previous implementation
- 93 schools; active rebel presence/possible threat from forces in Congo

Randomized (60 out of 159 schools)
- Treatment condition (34 schools)
- Waitlist control condition (26 schools)

Allocated to intervention condition
(7 schools)
Average size: 45.0 (SD=13.58)
Screening\(^a\) (n=361): selected 153 (42.0%)

Lost to follow-up at T2 (0 schools)
34 children refused to participate

Lost to follow-up at T3 (0 schools)
5 children refused to participate

Clusters analyzed 7
Individual children analyzed (Intent-to-treat) N=153

Allocated to waitlist condition
(7 schools)
Average size: 45.1 (SD=8.95)
1 school refused to participate (N=46)

Screening\(^a\) (n=270): selected 176 (65.0%)

Lost to follow-up at T2 (0 schools)
6 children refused to participate

Lost to follow-up at T3 (0 schools)
9 children refused to participate

Clusters analyzed 6
Individual children analyzed (Intent-to-treat) N=176

\(^a\) Children were excluded if (a) they did not meet inclusion criteria (experience at least one political violence event and scored higher than the cut-off on PTSD, depressive or anxiety symptoms) or (b) met exclusion criteria
