(A) Proportional load (Copy/ng) of HIV-1 integrants analyzed over 15 months post inoculation with TO11, TO12, and BH42.

(B) Western blot showing the presence of Env (rgp46 and gp46) and Gag (p53) proteins in cell cultures infected with BH24, BH42, TO11, and TO12.

(C) Proviral load (ng/ml) of p19 gag protein in TO11, TO12, and BH42 over 15 months post inoculation.

(D) Table showing the length and sequencing regions of LTR, gag, pol, env, Rex with corresponding bands in the Western blot.
