Figure S9 – Detection of apoptotic cells in the ovary at hatching

Double labeling for the detection of apoptotic cells by the TUNEL method (B and D) and of AMH (A) or Ovex1 (C) expression by *in situ* hybridization of digoxigenin-labeled riboprobes on serial transverse cryostat sections of left ovary at hatching (P1). (A, B) and (C, D) correspond to double-labeled sections. Apoptotic cells are labeled in green. Scale bar = 100 μm.
