The image shows a comparison of 25(OH) vitamin D levels (ng/ml) at baseline and 12 months for Nevirapine, Efavirenz, and PI. The y-axis represents the 25(OH) vitamin D levels, ranging from 0 to 40 ng/ml.

- Nevirapine: Baseline p = 0.017, 12 months p = 0.002
- Efavirenz: Baseline ns, 12 months ns
- PI: Baseline ns, 12 months ns

The graph indicates a statistically significant decrease in 25(OH) vitamin D levels at 12 months compared to baseline for Nevirapine and Efavirenz, with p-values of 0.017 and 0.002, respectively. There is no significant change for PI at both baseline and 12 months (ns).
