The graph shows the concentration (µmol/l) of \( \text{O}_2\text{Hb} \) and \( \text{CO}_2\text{Hb} \) over time. The x-axis represents time in seconds, with a scale of 20 s. There are markers for BH onset and BH offset. The y-axis shows concentration ranging from -1 to 5. The graph also includes a scatter plot with a linear trend line for \( \text{O}_2\text{Hb} \) in the right panel.
