The diagram illustrates the experimental protocol with the following time points:

- **Preliminary measures (t0):** 20 min + 5 min
- **Training (t1-t5):**
  - 2 min at t1, t2, t3, t4, t5
- **Post-training measures:** 25 min

The protocol includes the application of TMS (Transcranial Magnetic Stimulation) with the following dosages:

- **TMS x 20** during the preliminary measures
- **TMS x 10** during the training phase
