Figure 1

A bar chart showing relative expression levels for different cell lines, categorized by latency type and EBV status. The x-axis lists cell lines, and the y-axis represents relative expression levels on a logarithmic scale.

Latency type I: EBV (-) BL
Latency type II: EBV (-) NPC/epithelial
Latency type III: EBV (-) LCL

Cell lines include Daudi, Akata (+), Akata (-), T4, T5, T6, T7, C666, CNE2, B958, Raji, Namalwa, and Ramos.
