The graph shows the net OD value across different dilutions. The graph includes two lines:

- **Titration** line, which decreases sharply with increasing dilution.
- **Cut-off** line, which remains constant across all dilutions.

The x-axis represents the dilution factor, starting from 1:10 and increasing up to 1:1,000,000. The y-axis represents the net OD value, ranging from 0 to 3.
