Figure 5

(A) Western blot analysis of ABCA1, Pr55Gag, CA, and β-actin in Normal and NPCD55 cells with HIV and TO901317 treatment.

(B) Graph showing relative cellular free cholesterol levels for Normal + HIV and NPCD55 + HIV groups with untreated and TO-901317 treatments.

(C) Graph showing relative virion-associated free cholesterol levels for Norm + HIV and NPCD55 + HIV groups with untreated and TO-901317 treatments.

(D) Graph showing relative luciferase units for untreated and TO-901317 treatments in Norm + HIV and NPCD + HIV groups.
