The graph illustrates the Bax/Bcl-2 ratio across different treatments and time periods. The treatments include water, DMSO/H2O, CCE, AFB1, AFB1 + CCE pre-treatment, AFB1 + CCE post-treatment, and AFB1 + CCE post-treatment. The x-axis represents different treatments, while the y-axis shows the Bax/Bcl-2 ratio. The time periods are indicated as 15 days of treatment and 30 days of treatment.
