Supplemental Figure 1. Raw data for leptin, glucose, and insulin for the 24 subjects that were included in the analysis. Charts labeled A through R belong to MP1, while S, T, and U are MP2 and V, W, and X are MP3. Leptin, glucose and insulin track each other well as displayed by the temporal response pattern across the three parameters.
Plasma Leptin (μg/mL)  
Serum Insulin (pg/mL)  
Plasma Glucose (mg/dL)
