The image shows bar charts comparing the prevalence of MMI and low MMSE score across different categories of remaining teeth and CPI codes in two age groups: 65–74 years and 75 years or more.

### 65–74 years

- **Number of remaining teeth**
  - 22–32 teeth: (n = 1527)
  - 11–21 teeth: (n = 707)
  - 0–10 teeth: (n = 500)

- **MMI and Low MMSE score**
  - 22–32 teeth: * (significant)
  - 11–21 teeth: * (significant)
  - 0–10 teeth: * (significant)

### 75 years or more

- **Number of remaining teeth**
  - 22–32 teeth: (n = 350)
  - 11–21 teeth: (n = 547)
  - 0–10 teeth: (n = 547)

- **MMI and Low MMSE score**
  - 22–32 teeth: * (significant)
  - 11–21 teeth: * (significant)
  - 0–10 teeth: * (significant)

### CPI Codes

- **Code 0/1/2**
  - (n = 786)
- **Code 3**
  - (n = 1060)
- **Code 4**
  - (n = 637)
- **Code 0/1/2**
  - (n = 251)
- **Code 3**
  - (n = 465)
- **Code 4**
  - (n = 257)

The charts indicate a higher prevalence of low MMSE scores and MMI in older age groups, particularly among individuals with fewer remaining teeth.
