The diagram shows the percentage distribution of diagnostic items used in the Emergency Room (ER) based on the number of items used. The x-axis represents the number of diagnostic items used, ranging from 0 to 4. The y-axis represents the percentage (%). The categories for the number of diagnostic items are 0, 1, 2, 3, and 4. The data is categorized into time intervals: <1h, >1h<3h, >3h, >1h<3h, and >3h. The diagram illustrates the frequency of each category for each number of diagnostic items used.
