Identify all primary care practices in the geographical care covered by NT DeNDRoN

Identify interested practices and contact/visit them to explain the RCT

Primary care team recruited

Members of clinical team screen lists to identify potential participants using inclusion/exclusion criteria.

Clinician/professional to assess whether appropriate for the person with dementia to be invited to join a RCT and if they have the capacity to give informed consent

Administrative staff mail-merges above list with recruitment letter onto practice letterhead

Letters are checked and signed by practitioner and sent by administrative staff along with Information sheet and response letter. Follow-up request form and pre-paid envelope to person with dementia and their carer/consultee if they have one.

Consent gained from person with dementia and carer/consultee and opinion sought from carer/consultee if person with dementia lacks capacity, as appropriate.
