**Outcome measure**

- Cumulative morphine consumption
- DGSS pain questionnaire
- Morphine consumption
- Pain intensity
- Global scale
- Quantitative Sensory Testing
- Genetics

**Time schedule**

- Screening
- Baseline
- Randomisation

- Preoperative
  - Preemptive group: Etoricoxib 120 mg single dose
  - Postoperative Group: Placebo single dose

- Surgery

- Postoperative
  - Etoricoxib 120 mg for three days
  - Placebo for three days

- Follow Up
  - Etoricoxib 120 mg for three days
  - Placebo for three days
