Figure 2 - Trial procedures flow sheet

**Day 1: Admission**
- Admission patient > 18 y
- Informed Consent

**Inclusion Criteria**
- D/P: Oral admission
- Monitoring
- Other trial ongoing

**Exclusion Criteria**
- Diabetes mellitus I (BMI > 17 kg/m²)
- Short bowel syndrome
- Chronic PVD
- Home ventilation
- Known pregnancy
- Lactation
- NES > 3.5
- No indication
- CVC eating on admission
- Consent refused

**Randomization**
- Stratified by admission category
- Later PN
- Early PN

**Day 2: Planning Nutrition for Day 3**
- Will the patient be out tomorrow?

**Day 3 - 6: Planning Nutrition for the Next Day**
- Day X (3 - 6)
- Oral intake sufficient?

**Day X + 1**
- Oral intake insufficient?

**Plan for Day X + 1**
- Adjust flow rate D5% or adequate hydration
- Continue PN

**Evaluation of Nutrition Intake**
- Day X + 1

**Plan for Day X + 1**
- Increase EN flow rate twice daily until energy target is reached
- Adjust flow rate D5% for adequate hydration

**Evaluation of Nutrition Intake**
- Day X + 1

**Plan for Day X + 1**
- Give PN at 50% of calculated flow rate
- Stop EN

**Day 4, 5, 6**

**Plan for Day X + 1**
- D5% 20 ml/h
- Stop EN
- Order food

**Start EN**
- Day 1

**Start D5% 40 ml/h**

**Prescribed vitamins and trace elements if not yet prescribed**
- If no EN is started, the reason is registered in the F.D.M.S.
