**Sham features:**

1. Four automatic treatment programs for mechanical massage.

2. Simulated programmable thermal energy release between 40°C and 70°C with effective thermal release of 10% set-up value.

3. Simulation of infrared energy release at 50°C (without energy release).

4. Tilting position capability.

5. Mechanical energy and heat release simulation at the same time on the back region and legs.

7. MP3 music player for patient relaxation.

9. Vacuum fluorescent display (VFD) control display.
